SUMMARY

Front-end developer with a proven ability to work collaboratively across teams to deliver polished, user-friendly applications. Successfully transitioned into tech through self-driven re-education and immersive training. Brings strong technical proficiency, excellent interpersonal skills, and a deep sense of accountability. Known for being the teammate you can count on - dependable, proactive, and always ready to support others.

TECHNICAL SKILLS

Strong: HTML, CSS, JavaScript, jQuery, Angular, React, Redux, Git, GitHub, Bootstrap

Experienced: Ruby, Rails, GraphQL, SQL, MySQL, PostgreSQL, Materialize

EXPERIENCE

Senior Software Engineer

Experian | Costa Mesa, CA (Remote) | 11/2021 – 3/2025

- Led Hosted App implementation, enabling direct credit card applications rather than redirecting to partner sites.
- Used the iOS Simulator to debug WebView-related issues and implement effective fixes for web functionality.
- Oversaw deployments as Release Manager and Technical Lead, occasionally contributing as a QA.
- Conducted manual QA testing of tickets using Xray in Jira, ensuring thorough validation before release.
- Integrated Datadog analytics and created dashboards to monitor and address system performance issues.
- Increased Jasmine test coverage from ~10% to 50%+, reaching 100% in some modules.
- Documented the implementation of new features and troubleshooting procedures for team knowledge sharing.
- Pre-groomed tickets to ensure they contained all necessary information, adding technical notes as needed.
- Collaborated with PMO to prioritize sprint tickets and assign tasks by expertise and workload.
- Coordinated with teams to ensure the smooth integration of features within a microfrontend architecture.
- Partnered with backend developers to optimize GraphQL responses to support the transition to Server-Driven UI.
- Mentored new employees, offering guidance and support in understanding workflows and procedures.
- Technologies: **HTML, CSS, Angular, React, TypeScript, GraphQL, Datadog**

Software Engineer

Option Care Health | Chicago, IL (Remote) | 1/2020 – 10/2021

- Created wireframes and developed user interfaces to meet business requirements.
- Coordinated with backend team to ensure the successful sending and receiving of information via APIs.
- Worked alongside the DevOps Lead Engineer to implement deployment automation by leveraging Jenkins.
- Technologies: **HTML, CSS, Angular, TypeScript, SQL, PrimeNG**

Front End Developer

530medialab | Costa Mesa, CA | 4/2019 – 9/2019

- Created custom-themed WordPress websites with custom fields to facilitate client customization.
- Assisted lead developer in the completion of existing custom-themed WordPress websites.
- Added features, fixed bugs, and touched up styling in existing Shopify websites.
- Technologies: **HTML, SCSS, JavaScript, jQuery, PHP, Liquid**
